Bhopal, Madhya Pradesh, India

Summary

Computer Science student at VIT (graduating 2027) with hands-on experience in Python, SQL, Excel, and Power BI. Skilled at turning messy operational data into clean, validated datasets and clear dashboards, with a focus on data quality and logistics analytics.

Education

Vellore Institute of Technology 2023 – 2027
Bachelor of Technology in Computer Science and Engineering *CGPA: 8.30/10.0*

Experience

Summer Intern – Ordnance Clothing Factory (OCF) May 2026 – July 2026
Ministry of Defence Summer Internship Programme *Shahjahanpur, India*

- Automated data cleaning and validation workflows in **Python** and **SQL** across 5 operational datasets, replacing manual checks for missing values, duplicates, and inconsistencies.
- Maintained **Excel** and **Power BI** dashboards tracking 8 operational KPIs and documented findings to support decision-making.
- Built a **RAG** backend for the factory health clinic using ChromaDB and Groq Llama 3.3, delivering AI answers in under 2 seconds with **100%** patient-level data isolation (GitHub).
- Developed a full-stack healthcare records app (FastAPI, React, PostgreSQL, JWT), cutting record retrieval from 5s to under 2s using indexed **SQL** queries.

Projects

Indian Logistics Operations Analytics | GitHub | *Python, SQL, Power BI, Excel* Oct 2026

- Queried a relational database of 6,000+ logistics records using SQL and Excel (multi-table queries, Pivot Tables) to assess carrier performance and delivery bottlenecks.
- Developed a Python data pipeline and a basic classification model to identify key factors behind shipment delays.
- Designed an interactive 3-page Power BI dashboard tracking operational KPIs, on-time delivery, and regional fulfillment.

E-commerce Sales & Customer Analytics | GitHub | *SQL, Python, Power BI, Excel* Oct 2026

- Explored a relational database of 99K+ orders across 9 tables using Python and SQL to track revenue, seller performance, and delivery metrics.
- Found that late deliveries were linked to lower customer review scores, and that a small group of product categories drove most of the revenue.
- Designed a 5-page Power BI dashboard for sales and delivery performance, using Excel to cross-check key figures.

Technical Skills

Languages & Databases: Python, SQL, Java
Data Analysis: EDA, Data Cleaning, Data Validation, Data Quality Checks, Root Cause Analysis
Visualization & Reporting: Power BI, Microsoft Excel, Dashboard Development, KPI Reporting
Generative AI: LLMs, Retrieval-Augmented Generation (RAG), Agentic AI (Basic)
CS Fundamentals & Tools: DSA, OOP, Git, Documentation

Certifications

Applied Machine Learning in Python Jul 2025
University of Michigan

Google IT Support Professional Certificate Feb 2026
Google
